

**Full National Classing Rules:** <https://timetrials.scca.com/pages/classmycar>

## **Sports Category - Alternate Motorsports Series Classing**

1. Cars listed as eligible in and prepared to the current SCCA Solo Street Category Rules are permitted to compete in their listed Time Trials Sport classes and are not restricted to Sport Class tire-width limits. Solo SSR-class vehicles are restricted to Sport Category minimum tread wear ratings. Vehicles with this allowance are not permitted to interchange preparation Rules.
2. Cars listed as eligible in and prepared to the current SCCA Autocross Solo Spec Coup (SSC) Rules are permitted to compete in Time Trials Sport Class 6 (S6). SSC cars with this allowance are not permitted to interchange preparation Rules and must run on the spec tire.
3. Cars listed as eligible in and prepared to the previous SCCA Road Race Showroom Stock Rules are permitted to compete in their respective Time Trials Sport classes provided they run on Time Trials legal tires. Vehicles with this allowance are not permitted to interchange preparation Rules otherwise.

## **Modifications typically allowed in Sport**

OBD-based ECU reflashes

Most wheels

Single-adjustable fixed-perched shocks

Lowering spring kits

Direct-replacement sway bars

Cold-air intakes

Cat-back exhausts

Radiator and fluid coolers

Brake option packages and some cosmetic modifications from a different trim model of the vehicle—like swapping spoilers

**Full National Classing Rules:** <https://timetrials.scca.com/pages/classmycar>

## **Tuner Category - Alternate Motorsports Series Classing**

This is where we're going to put cars that might not quite meet the rules, but we think they can go in this category anyway.

1. Cars listed as eligible in and prepared to the **SCCA Road Race National Touring 2, 3 and 4** Rules are permitted to compete in their respective Time Trials Tuner Class provided they run on Time Trials legal tires. Vehicles with this allowance are not permitted to interchange preparation rules otherwise.

2. Cars listed as eligible in and prepared to the **SCCA Road Race National Spec Miata** Rules are permitted to compete in Time Trials Tuner Class 5 (T5) provided they run on Time Trials legal tires. Vehicles with this allowance are not permitted to interchange preparation rules otherwise.

**Note: SCCA Solo Street Prepared** has been rejected for Tuner Category inclusion because a full-tilt Street Prepared car is an engine-swapped, intake-manifold customized Frankenstein creation which is awesome, but doesn't belong in Tuner Category.

### **Modifications typically allowed in Tuner**

Intercoolers and boost controllers on forced induction cars

Headers

Caster/camber plates

Ride-height adjustable coilovers

Racing springs

Highly tunable sway bars

Aftermarket ECUs for non-OBD cars

Aftermarket big brake kits

**Full National Classing Rules:** <https://timetrials.scca.com/pages/classmycar>

## **Max Category - Alternate Motorsports Series Classing**

Max Category is for what we consider the "Maximum" street cars.

Maybe they only get driven on Sundays, or are pure track cars which could be driven on the street. This is where you find engine swaps, aftermarket or increased forced induction, suspension geometry changes, or even aftermarket wings and bodywork.

## **National Class**

### **Max 1 (M1)**

1. Max 1 eligible vehicles include production vehicles and eligible kit cars not weighing less than 2,500 lbs. and:
  - A. Naturally aspirated 4-cycle engines greater than 6.4L OE measured displacement
  - B. Naturally aspirated rotary or 2-cycle engines greater than 2.0L OE measured displacement
  - C. Modified or Unmodified single-unit forced-induction engines greater than 6.4L OE measured displacement
  - D. Multi-unit forced-induction engine configurations greater than 2.9L (4-cylinder)
  - E. Electric vehicles with greater than 400KW OE rated motor(s).
2. Max 1 eligible vehicles include the following underweight vehicles from classes below:
  - A. Vehicles within Max 2 eligible limits weighing less than 2,800 lbs. but not less than 2,500 lbs.
  - B. Vehicles within Max 3 eligible limits weighing less than 2,300 lbs. but not less than 2,000 lbs.
  - C. Vehicles within Max 4 eligible limits weighing less than 2,000 lbs. but not less than 1,800 lbs.
  - D. Vehicles within Max 5 eligible limits weighing less than 1,300 lbs. but not less than 1,100 lbs.
3. Max 1 eligible vehicles include the following low-production vehicles (less than 1,000 examples):
  - A. Vehicles which meet power, displacement and configurations for the class.

### **Max 2 (M2)**

1. Max 2 eligible vehicles include production vehicles of more than 1,000 examples and eligible kit cars:
  - A. Unmodified naturally aspirated 4-cycle engines of up to 6.4L OE measured displacement
  - B. Unmodified naturally aspirated rotary or 2-cycle engines of up to 2.0L OE measured displacement
  - C. Modified naturally aspirated 4-cycle/rotary engines up to their respective displacement
  - D. Unmodified single-unit forced induction 4-cycle/rotary engines within their respective displacement
  - E. Modified or unmodified multi-unit forced induction engines or modified configurations within their respective displacement
  - F. Electric vehicles with unmodified OE batteries and up to 400 KW OE rated motor(s)
  - G. Electric vehicles with modified/replaced batteries or modified motor(s)
2. Max 2 eligible vehicles include the following underweight vehicles from classes below:
  - A. Vehicles powered by Max 3 eligible engines/motors weighing less than 2,800 lbs. but not less than 2,500 lbs.
  - B. Vehicles powered by Max 4 eligible engines/motors weighing less than 2,300 lbs. but not less than 2,000 lbs.
  - C. Vehicles powered by Max 5 eligible engines/motors weighing less than 1,300 lbs. but not less than 1,100 lbs.

### **Max 3 (M3)**

1. Max 3 eligible vehicles include production vehicles of more than 1,000 examples and eligible kit cars:
  - A. Unmodified naturally aspirated 4-cycle engines of up to 4.5L OE measured displacement
  - B. Unmodified naturally aspirated rotary or 2-cycle engines of up to 2.0L OE measured displacement
  - C. Modified naturally aspirated 4-cycle/rotary engines up to their respective displacement

- D. Unmodified single-unit forced induction 4-cycle/rotary engines within
- E. Electric vehicles with unmodified OE batteries and up to 250 KW of OE
- F. Electric vehicles with modified/replaced batteries or modified motor(s)

2. Max 3 (M3) eligible vehicles include the following underweight vehicles from classes below:

- A. Vehicles within Max 4 eligible limits weighing less than 2,200 lbs. but r
- B. Vehicles within Max 5 eligible limits weighing less than 1,700 lbs. but r

#### **Max 4 (M4)**

1. Max 4 eligible vehicles include production vehicles of more than 1,000 examples and eligible kit cars

- A. Unmodified naturally aspirated 4-cycle engines of up to 2.9L OE meas
- B. Unmodified naturally aspirated rotary or 2-cycle engines of up to 1.5L
- C. Modified naturally aspirated 4-cycle/rotary engines up to their respect
- D. Unmodified single-unit forced induction 4-cycle/rotary engines within
- E. Electric vehicles with unmodified OE batteries and up to 175 KW of OE
- F. Electric vehicles with modified/replaced batteries or modified motor(s)

2. Max 4 eligible vehicles include the following underweight vehicles from classes below:

- A. Vehicles within Max 5 eligible limits weighing less than 1,900 lbs. but r

#### **Max 5 (M5)**

1. Max 5 eligible vehicles include production vehicles of more than 1,000 examples and eligible kit cars

- A. Unmodified naturally aspirated 4-cycle engines of up to 1.9L OE meas
- B. Unmodified naturally aspirated rotary or 2-cycle engines of up to 1.25
- C. Electric vehicles with unmodified OE batteries and up to 100KW of OE

#### **Max Category Eligible Kit Cars**

The following kit cars are eligible for Max Category:

1. Shelby Cobra Models
2. Shelby Daytona Coupe Models
3. Corvette 1963 Grand Sport Models
4. Ariel Atom
5. Exocet
6. Noble M400/M12 and Rossion Q1
7. Brunton Auto - Stalker
8. Factory Five 818/818C

lbs. or 95% of curb weight (with driver), whichever is greater, powered by the following OE engine displacement.

measured displacement.

than 4.5L OE measured displacement.

1-Cycle) or 1.75L (Rotary/2-Cycle) OE measured displacement.

not less than 2,400 lbs. or 95% of curb weight (whichever is greater).

not less than 2,000 lbs. or 95% of curb weight (whichever is greater).

not less than 1,600 lbs. or 95% of curb weight (whichever is greater).

not less than 1,100 lbs. or 95% of curb weight (whichever is greater).

Classes below, not weighing less than 1,100 lbs. or 95% of curb weight (with driver) whichever is

not weighing less than 2,800 lbs. or 95% of curb weight (with driver), whichever is greater, powered displacement.

OE measured displacement.

relative Max 3 listed OE measured naturally aspirated unmodified displacement limit.

at their respective Max 3 listed OE measured naturally aspirated unmodified limit.

and/or added forced induction within Max 4 listed OE measured naturally aspirated unmodified limit of the rated motor(s).

up to Max 3 OE rated motor(s).

not less than 2,500 lbs. but not less than 2,300 lbs. or 95% of curb weight (with driver) whichever is greater.

not less than 2,000 lbs. but not less than 1,800 lbs. or 95% of curb weight (with driver) whichever is greater.

not less than 1,500 lbs. but not less than 1,300 lbs. or 95% of curb weight (with driver) whichever is greater.

not weighing less than 2,500 lbs. or 95% of curb weight (with driver), whichever is greater, powered displacement.

OE measured displacement.

relative Max 4 listed OE measured naturally aspirated unmodified displacement limit.

not less than their respective Max 4 listed OE measured naturally aspirated unmodified displacement limit.  
not less than Max 4 OE rated motor(s).  
not less than up to Max 5 OE rated motor(s) limit.

not less than 2,000 lbs. or 95% of curb weight, (with driver) whichever is greater.  
not less than 1,500 lbs. or 95% of curb weight, (with driver) whichever is greater.

not weighing less than 2,200 lbs. or 95% of curb weight (with driver), whichever is greater, powered displacement.

not less than OE measured displacement.

not less than Max 5 listed OE measured naturally aspirated unmodified displacement limit.

not less than their respective Max 5 listed OE measured naturally aspirated unmodified displacement limit.  
not less than Max 5 OE rated motor(s).

not less than up to Max 5 OE rated motor(s) limit.

not less than 1,700 lbs. or 95% of curb weight, (with driver) whichever is greater.

not weighing less than 1,900 lbs. or 95% of curb weight (with driver), whichever is greater, powered displacement.

not less than OE measured displacement.

not less than Max 5 OE rated motor(s).

re displacement or KW-rated motor(s):

greater.

## Full National Classing Rules <https://timetrials.scca.com/pages/classmycar>

Unlimited Category is for those production-based vehicles that are not street-going, are pure race cars, or are on DOT tires with less than 200 Treadwear or non-DOT racing tires. This is where you find tube frame race cars, giant wings, ground effects, stripped interiors and the fastest of the fast.

### OPEN WHEEL CARS ARE EXCLUDED DUE TO SAFETY ISSUES

Class	Make	Model
-------	------	-------

#### 1. Unlimited 1

Cars which are production silhouette, but are over the displacement limits or under the weight limits for

1. U1 minimum weight: None

#### 2. Unlimited 2

Cars which are production silhouette and meet the following criteria:

1. U2 minimum weight: 1,750 Lbs. (With Driver.)
2. U2 Maximum Displacement, 3.0 Liters corrected displacement.

#### 3. Displacement Modifiers

To determine the corrected displacement for classing purposes, the following formulas will be used:

1. Rotary: Actual displacement X 2.0
  2. 2-Cycle Engines: Actual displacement X 2.0
  3. Forced induction: Actual or corrected displacement X 1.5
- A. For each additional forced induction unit 0.5 should be added to the forced induction multiplier.

#### 4. Suggested Sports Racer/Formula Car Classing (Regional Events Only)

If Regions run under National Events Classing, and include a non-production class for Unlimited Category

##### 1. Time Trial Special (TTS)

For any open wheel, sports racer or other vehicle which doesn't fit into any other class

##### 2. Time Trial Atlantic (TTA):

SCCA Road Race legal Formula Atlantic cars, Formula B/1000 cars, P1 and P2.

##### 3. Time Trial Winged (TTW):

Time Trial Winged. SCCA Legal Formula Continental/F2000, Star Formula Mazda, Formula

##### 4. Time Trial Non-Winged (TTN):

SCCA Legal Formula F, Formula 500, Solo Vee, SRF3.

##### 5. Time Trial V (TTV): TTV:

SCCA Legal Formula Vee, Formula First, SRF.

or Unlimited 2. (U2)

ction displacement modifier (e.g., twin charged, twin turbo: Actual corrected displacement X 2. Q  
dry vehicles, it is recommended that Regions run the suggested classes for Formula Cars, Sports  
ss. Cars must meet safety requirements for SCCA HillClimb or GCR.

rmula Enterprise, Sports 2000.

quad turbo: Actual displacement X 3).

Racers and Specials.
